Sales conditions

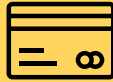

Production times

Our products take from 60 to 90 days to be manufactured, from the time when the order is placed. This time period may be longer or shorter, depending on the weather conditions that may help or hinder the firing and drying of the material.

Customization

Our zellige catalog offers different colors and designs. You can create tailor-made sets by selecting designs and applying the colors or color combinations that best suit your project.

Placing an order

Initial payment of 50% of the amount quoted, by transfer, and the remaining 50% once the order is delivered. 100% of the amount quoted must be paid when placing international orders.

Dimensional tolerances

Our tiles, due to their handcrafted nature, may present slight variations in their actual measurements once produced. As a result of different drying times, the shrinkage of our pastes may be altered and vary the size of our tiles by up to ± 5 mm. In these cases, it will be necessary to compensate for these variations through the joint size at the time of installation.

Likewise, combinations of formats with different finishes are more exposed to these variations in shrinkage and there is a possibility that the same format may present slight variations in size in different finishes.

Services

Free quotation

We produce a quotation suited to the client's needs.
This is the most effective way to see the breakdown of costs for the material you are interested in.

Technical Office

Our technical team can advise you on:

- Project personalization and planning.
- Installation process.
- Cleaning, protection and maintenance process.
- Provision of guidebooks outlining all the steps.

Samples

Do you want to know better our finishes?
Ordering a sample set is the best way to appreciate the silky texture and the nuances of the colors that we manufacture. The price of sample orders accumulates as available credit for future orders.

tb.

finishes you need to know

The completely handcrafted character of our zellige makes each piece unique and unrepeatable, and the best way to do this is through a sample set!

This way you will get to know our selection of zellige colors, and you will be able to evaluate their appearance and finish in the best possible way.

todobarro. x AITMANOS

hispano- arabic heritage

Passion for artisanship and for our cultural heritage is what brings us to this collaboration with Ait Manos. Both brands work for the defense of local craftsmanship and its actualization through design.

Ait Manos is a world reference in the preservation of the traditional Moroccan method of producing zellige. Its work enhances the value of this historic material through innovation and design. Companies like Ait Manos are indispensable in the preservation of the craftsmanship necessary to produce zellige of the highest quality.

We join this work in a project that seeks to enhance the Hispano-arabic bridge that is the Mediterranean culture. A commitment to the combination of Moroccan tradition, innovation in handcrafted materials and contemporary design perspective.

tb.

preservation of culture and tradition

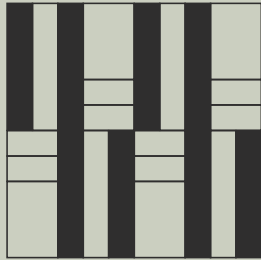

Our zellige tiles are produced by Aït Manos and are crafted with 98% natural Moroccan clay and 2% water and glaze. Firing process is performed in gas kilns using clean energy only.

These entirely handmade mosaics are made using the authentic zellige method and are recognized by the Moroccan Ministry of Culture for their work in preserving culture and craftsmanship.

.6

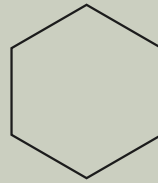

summary

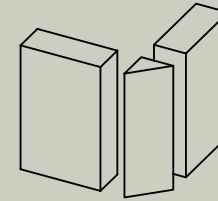

Mediterránea collection

A collection inspired by the link between the historical origin of zellige and the Andalusian culture. A new interpretation of this material.

Essentials

Selection of elementary zellige formats. A set of geometric pieces that cannot be missing in any project.

Finishing pieces

Special finishing tiles.

General index

handcrafted zellige

The zellige is a type of handmade mosaic tile characteristic of Hispano-arabic architecture whose origin dates back to the 10th century in Fez, Morocco. These tiles are glazed and cut by hand, after firing, using a small sharp hammer called "menqach".

This work, carried out by expert craftsmen, makes each piece unique and allows them to be installed practically seamlessly thanks to the beveling of their edges. In this way, unrepeatable combinations are

obtained in which the shades of color, the thickness of each piece and, above all, their characteristic geometric designs take center stage.

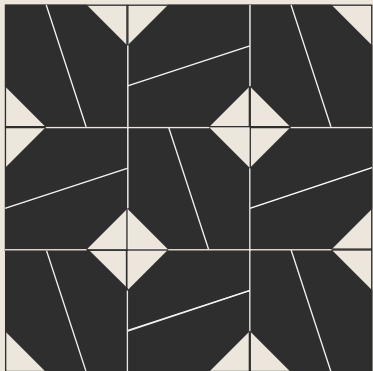

The zellige is one of the symbols of old-Andalusian culture and has become the main historical showcase of the advances in geometry, mathematics and craftsmanship that this culture cultivated on the shores of the Mediterranean.

tb.

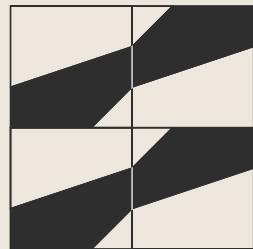

pre-assembled zellige

BEST OF BOTH WORLDS

Several of our zellige products are delivered in 20×20 cm or 30×30 cm sheets to simplify installation on site, while preserving the identity and complexity of each design.

Color variations and tones

Our zellige colors have a great nuance richness due to their manual production and natural origin. Each color contains micro-variations that make it unique. Please note that different

batches of pieces may present shade variations, so **we recommend requesting samples** to assess the live finish.

B All of our zellige colors have a **glossy finish.**
